Hello!

This is us...

We are a leading software company specializing in tools for print professionals. Our offerings include industry-leading PDF quality control and editing tools, as well as the most affordable and flexible automation platform for file handling across print & beyond.

Who are you?

A printer that...

- Manages less than 20 files a day.
- Manages from 20 to 50 files a day.
- Does manual imposition or nesting.
- Manages different type of machines and processes.
- Works in a specific industry sector and is looking for ways to automate.

Not a printer...

- You are a software or hardware producer or partner.

Where to go in this brochure?

Check out PitStop Pro, the best tool for prepress (p.4)

Consider PitStop Server, PitStop Library SDK or PitStop Library Container (p.5)

Explore Griffin if you need a powerful and easy-to-use wide-format job nesting tool (p.9)

Look into Phoenix to simulate your production environment to evaluate you capabilities and, with help of AI, optimize your planning (p.8)

Browse our Solutions to find the best fit for your use cases (p.12)

Then check out our Technology Partners page. Your products can integrate with ours! (p.14)

PITSTOP

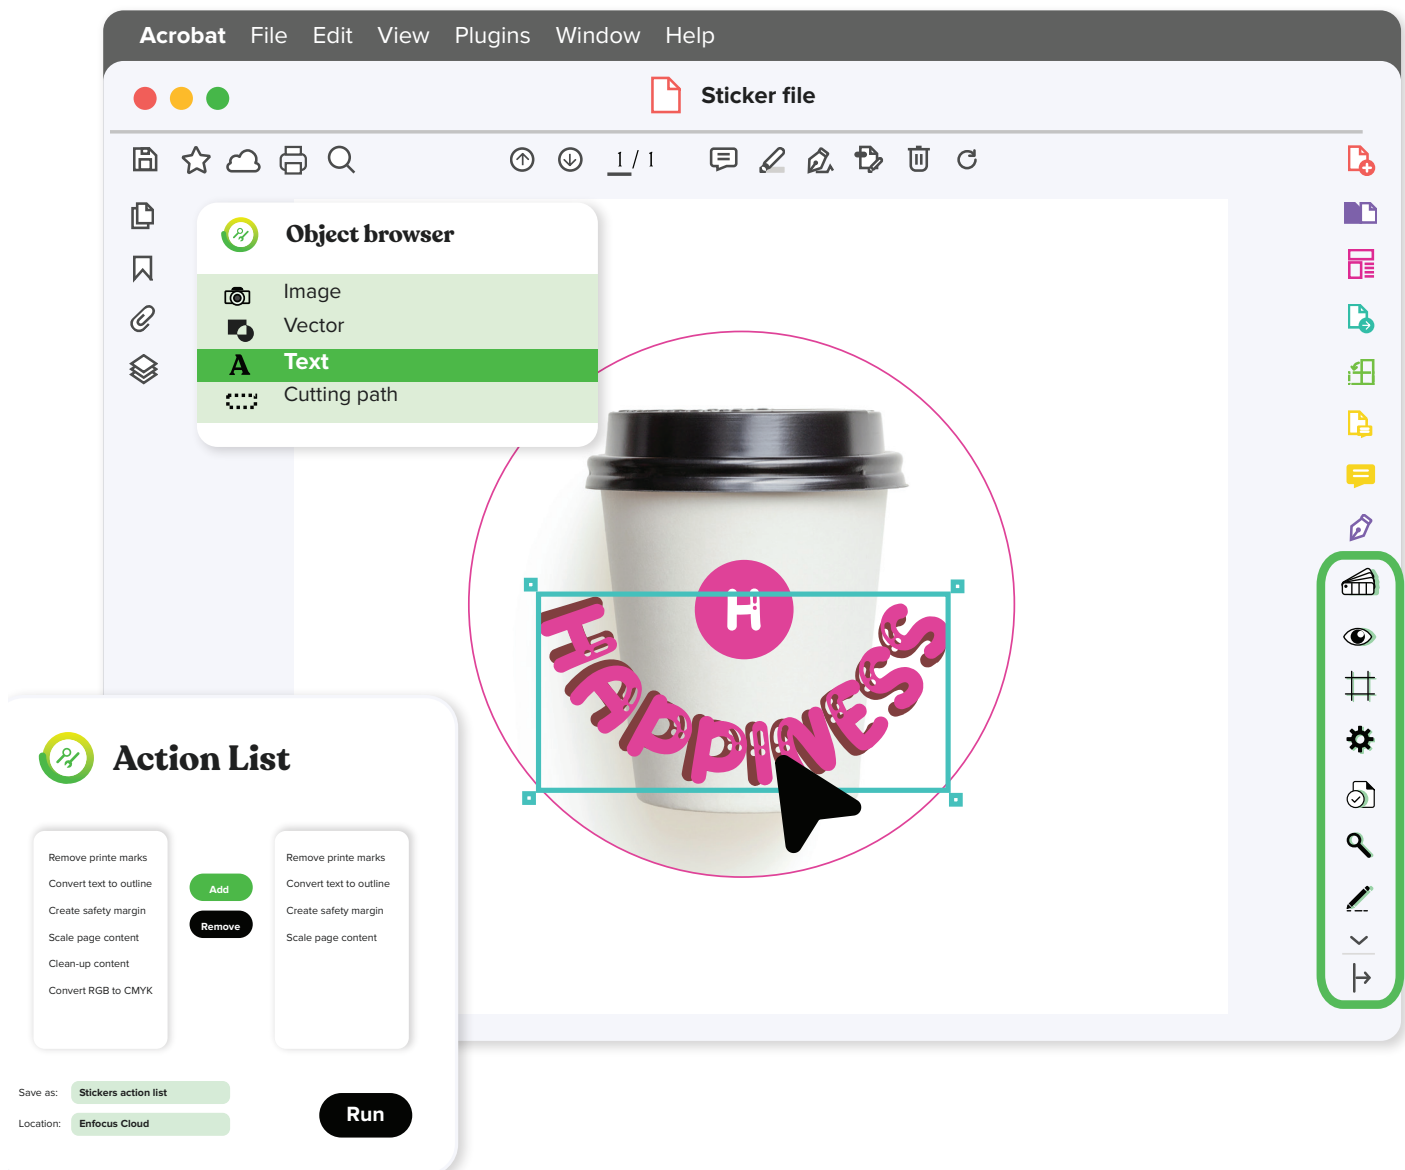

More than 25 years of PDF the right way

If you work in print, Enfocus PitStop will need no introduction. For 25 years, PitStop Pro and Server have been the industry-leading tools for checking and fixing PDFs destined for production.

Only 9% of PDFs received in a print shop are actually print ready. **PitStop is able to fix around 84% of PDF errors** eliminating the need to contact customers for corrected files.

This checklist of things PitStop can check and fix is only the beginning of its capabilities:

- **Image resolution**
- **RGB objects**
- **Font issues**
- **Missing bleed**
- **Ink coverage**
- **White element knockout**
- **Rich black**
- **Transparency**
- **Adding grommets**
- **Adjust color values**
- **Many more...**

The PitStop family

PITSTOP PRO

Adobe Acrobat plugin for manual and semi-automatic preflight and correction with Action List.
Scan QR to learn more about it.

PITSTOP SERVER

PitStop Server automates onboarding, preflight and PDF file repair and is a stepping stone in your automated workflow. It allows 3rd party integration using CLI.
Scan QR to learn more about it.

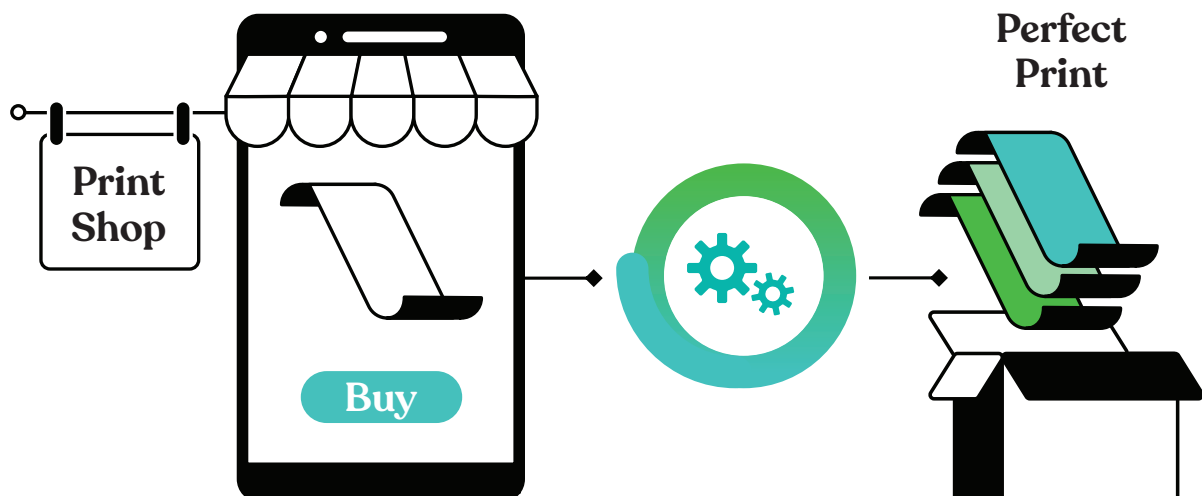

PITSTOP LIBRARY SDK

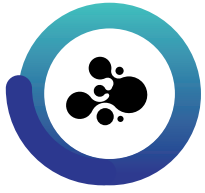

A powerful tool with Pitstop preflight and correction capabilities designed to be integrated into your OEM solution.
Scan QR to learn more about it.

PITSTOP LIBRARY CONTAINER

Ideal for integration with cloud-based applications, web to print systems and OEMs; controlled via REST API.

The most flexible automation platform

SWITCH

If you're not automating your print workflow with Enfocus Switch, you're missing a huge opportunity to reduce waste and increase quality and throughput.

Automation is today's safest investment. **With Enfocus Switch, customers usually see significant ROI within six months of purchase.**

Automation saves time and money by eliminating errors, reducing repetitive tasks, and increasing efficiency. It's a no-brainer for any print shop that wants to stay competitive.

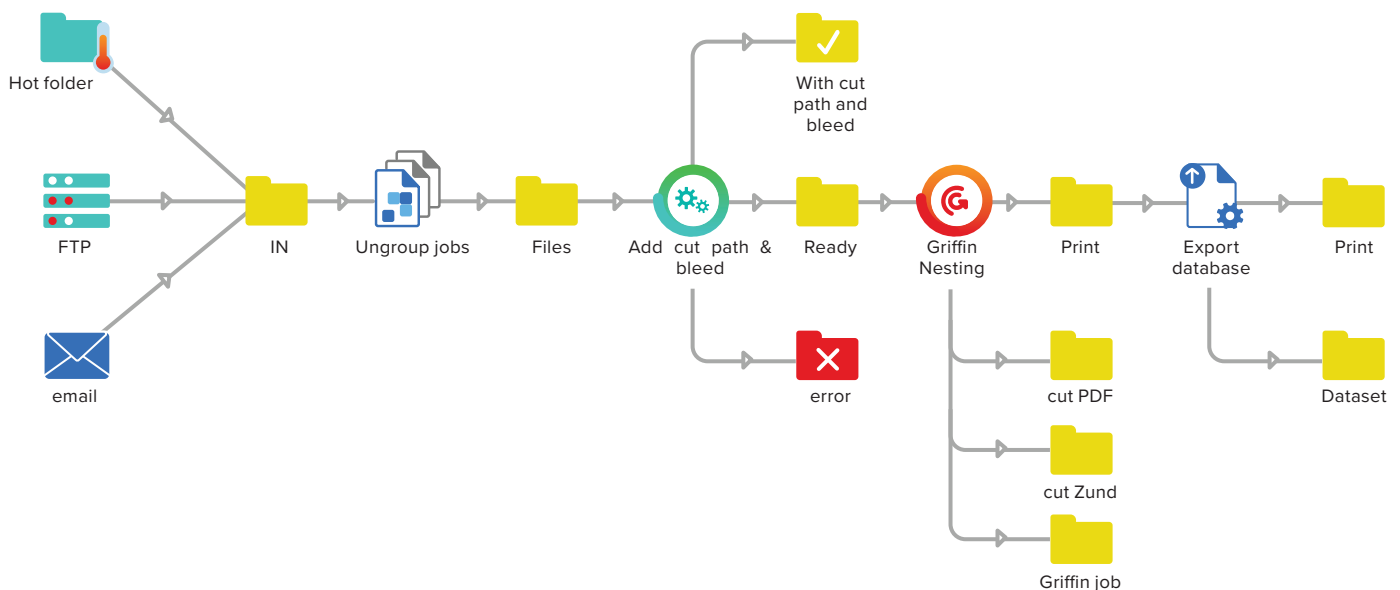

You'll see immediate improvements in your job quality and capacity, while saving time on repetitive tasks. And with rapid ROI guaranteed, greater profits will quickly follow.

Enfocus Switch makes automation simple, affordable and incremental:

- **Learn on your own time** or with the help of expert resellers
- **Progressively automate** all aspects of your business
- **Improve consistency** with simple or highly complex workflows
- **Boost employee productivity** by eliminating repetitive, soul-sucking work

So, if you're still undecided about automation, maybe it's time to get off the fence. Contact us today to request a demo and discuss your automation needs with an expert.

ENFOCUS APPSTORE

The Enfocus Appstore is an online marketplace where you can instantly buy and use applications that extend your Switch flows and ultimately, your operations.

You can also become an app creator!

Switch has a community of specialists including users, integrators and Channel Partners around the globe. Over the years, this community has grown, and knowledge is now shared in the Enfocus Forum.

The Enfocus Appstore is an extension of our commitment to openness and collaboration with our customers and partners.

You can become an app creator or get in contact with us to submit your app idea, meet your developer, test and get the app.

Check out the different categories of our apps:

- **Artificial Intelligence (AI)**
- **Communication**
- **Image handling**
- **Large Format Printing**
- **Metadata handling**
- **Reporting**
- **Variable data printing**
- **File conversion**
- **File output**
- **File transfer**
- **Flow design**
- **Imposition, tiling, ganging**
- **Online proofing**
- **MIS - ERP**
- **DAM**
- **PitStop Server**
- **Third party integration**

Intelligent planning, Imposing results

PHOENIX

Ready for a new era of production efficiency? Phoenix isn't just another planning tool; it's automation with AI-driven genius. The result: a new type of print planning technology that is rapidly changing the industry.

If you're ready for superior imposition while slashing time and costs through world-leading job planning, Phoenix is about to become your indispensable ally.

Phoenix enables real-time, data-driven, automated decisions that bring unparalleled efficiency, savings, and speed to every type of print business.

Integration

Plug and play with Switch and effortlessly automate your planning and imposition tasks across workflows, devices and locations.

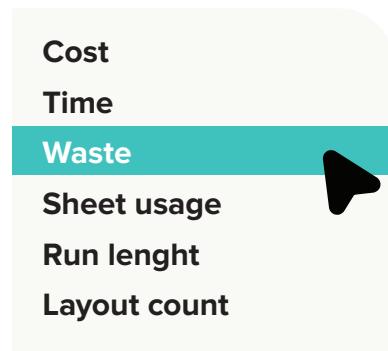

Imposition

Couple Switch automation with AI-driven imposition to get the most efficient impositions from your workflows at incredible speed.

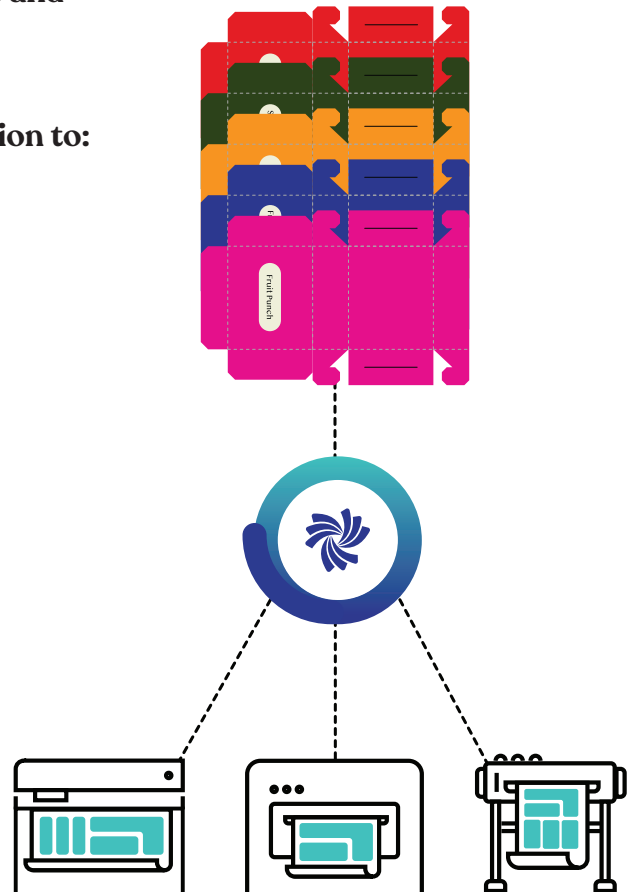

Planning

Link your workflow platforms and devices with Switch, then let Phoenix calculate the most cost-effective plans for every job in seconds.

- Optimal planning from millions of options
- Dynamic cost calculations based on output device and more
- Ensures job estimates are pinpoint accurate
- Phoenix filters or sorts by your preference in relation to:

The wide format nesting powerhouse

GRIFFIN

Does job nesting give you nightmares? Then it's time to experience Griffin, the wide format nesting champion that turns complex nesting tasks into child's play.

Setup is simple and in no time, you'll be reveling in automagical nesting capabilities that have not just won awards, but also the hearts of production pros all over the world.

Easy to use

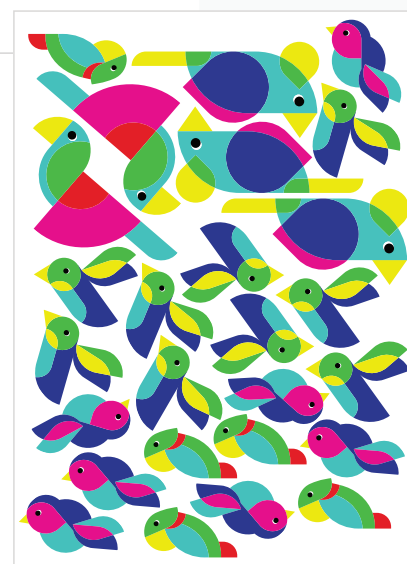

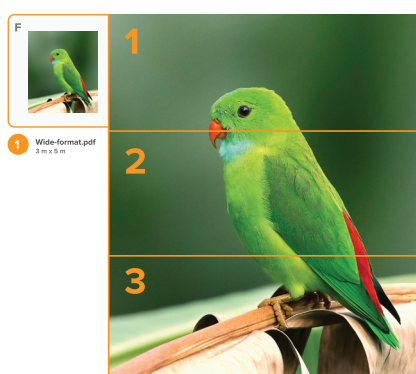

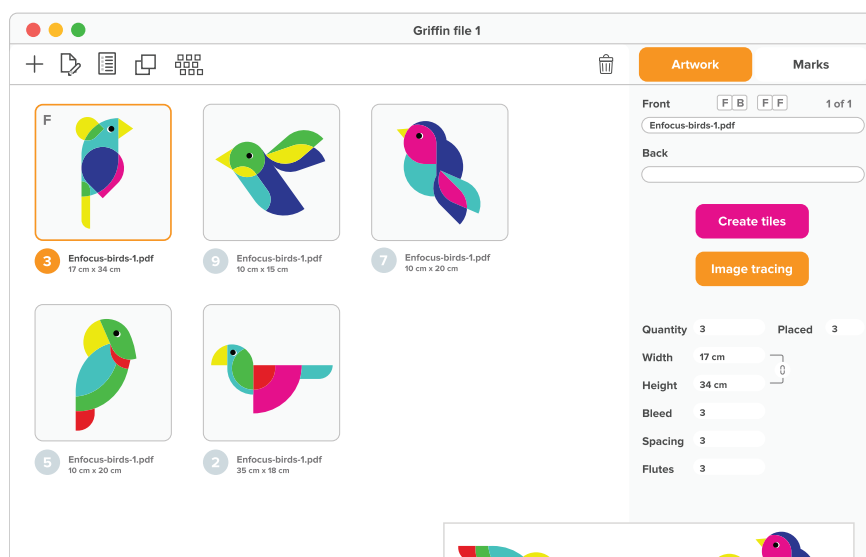

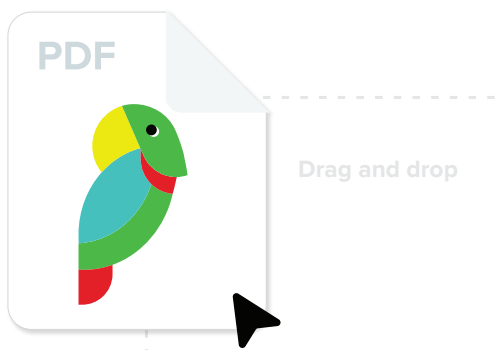

Griffin's jaw-droppingly powerful tools are available through an intuitive and delightful interface that makes configuring wide format nesting tasks a breeze.

Automated Nesting

Nest any shape in any quantity on any wide-format sheet. An award-winning toolkit will save hours if not days each week spent on manual nesting and imposition of complex jobs.

Universal Device Support

Griffin is built to fit right in with all your current technology. Beyond getting the most out of existing investments, you'll see huge efficiency gains in all your processes.

- Supports DXF and PDF, Zünd Cut Center, Kongsberg and more
- Generates cut paths, sets bleed, automatically registers front-to-back graphics
- Full integration with Enfocus Switch flows

Online Proofing done right with Review

REVIEW

Review is the first product built on the newly launched Enfocus Cloud.

Review centralizes communication between your customers, customer sales reps, prepress, and production teams, effortlessly handling proofing feedback while integrating beautifully with your Enfocus Switch production flows.

A modern, user-friendly interface makes it easy for users of any skill level to review files. And there's no installation or software download needed, so they'll be up and running as fast as they can click a link.

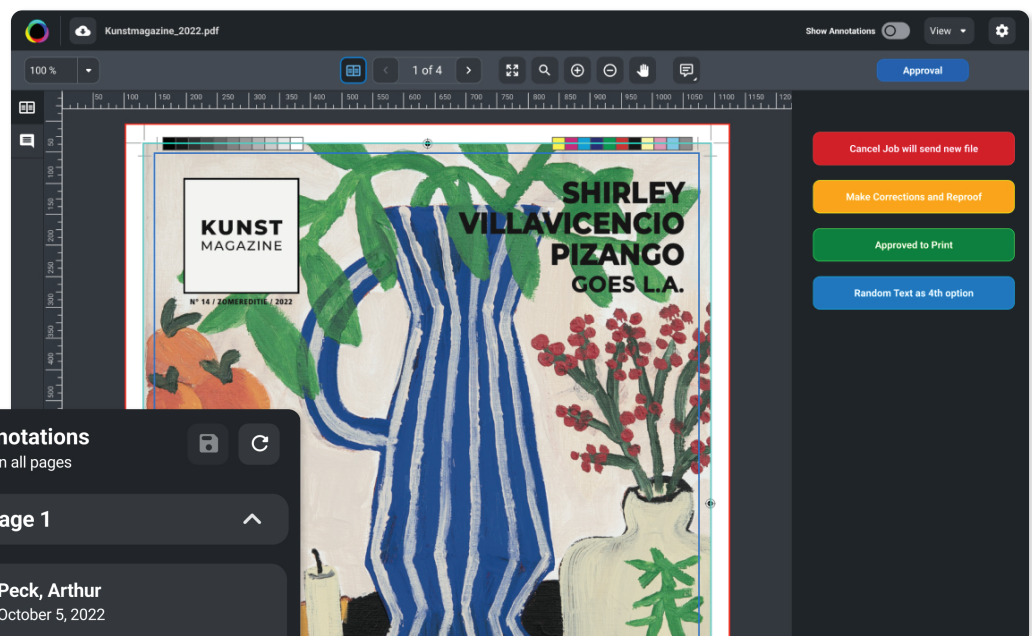

Full integration with Enfocus Switch means **Review** automatically gets the file status to the right people in customer service or straight into production.

And **Review** is built on Enfocus Cloud so even the largest files can be previewed instantly anywhere on the planet. Plus, it's incredibly affordable!

Forget reprints and lengthy review cycles! Save big with Review, and rest easy that your customers will be delighted at every step of their journey.

“Review is one of the best investments we made in a long time. This enables ZeroPlus to keep up with today’s demand.”

Vernon van Dyk, Prepress Manager, ZeroPlus

Scan to learn more about Review

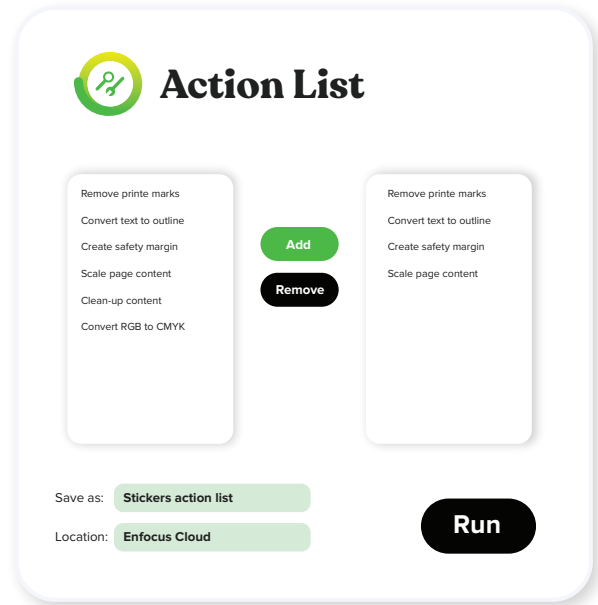

The new Enfocus Cloud platform enables you to manage resources across multiple teams, and communicate with your customers faster, automating and consolidating all processes related to job onboarding, file handling, pre-flighting, customer approval, and preparation for print production.

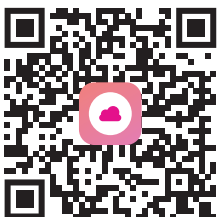

The Benefits of using Enfocus Cloud

- **Scalability:** Easily adjust resources to match demand.
- **Cost Efficiency:** Pay only for what you use, avoiding large upfront costs.
- **Accessibility:** Access data and apps from anywhere with internet.
- **Automatic Updates:** Providers handle updates and maintenance.
- **Disaster Recovery:** Built-in backup and recovery options.
- **Security:** Enhanced features like encryption and multi-factor authentication.
- **Collaboration:** Real-time teamwork on shared projects.

- **Guaranteed uptime of 99%.**
- **Enfocus Cloud is ISO 27001 and SOC 2 certified.**
- **At enfocus.cloud you will be able to manage users, groups, equipments, projects and more.**
- **Enfocus Cloud will be the cradle for further Enfocus developments.**

What customers say

Watch video

“We took a three to four hour per label job, prepress time, down to about fifteen minutes, max.”

Adam Seiz

Director of Process Improvement, Bennet Graphics, Atlanta, US

“Thanks to PitStop, we can take ink readings of artwork and send that to our MIS. By using this data to take routing decisions, we save about 40K USD in ink each month.”

Matthew Kay

Workflow Specialist, Bluetree Group, Rotherham, UK

Watch video

Watch video

“Our online store is a great example. Because if products had to come in and actually go through prepress and then get handled to handoff just to get printed, we are talking about hours. Whereas today Switch takes that and literally flips it around within less than a minute.”

Cami Lawson

Cami Lawson, Programming Manager, SunDance, Orlando, US.

“It’s the software and the digital workflow that brings real return on investment to the business.”

Paul Manning

Managing Director, Rapidity, London, UK

Technology partners

Taking advantage of our technologies and know-how reduces your development efforts and costs, and gives your customers a competitive edge.

Do you find our technology useful to your job or product?

There are many ways of partnering up with Enfocus. Whatever your requirements are, Enfocus can be your partner in becoming more competitive. When it comes to integrations, think beyond the basics—just a few of the possibilities include:

- **XML job tickets:** Dynamically configure Smart Preflight variables.
- **JSON data from webhooks:** Adjust templates, fine-tune production parameters, or personalize output documents.
- **Database connections:** Seamlessly retrieve and store data throughout your automation workflows.
- **API integrations:** Connect to third-party applications and services through REST or SOAP APIs.
- **Scripting capabilities:** Extend, customize, and automate your workflows using scripts. Your imagination truly is the limit!

Become an Enfocus partner along with an impressive list of industry leaders.
